[BACK SUMMARY](#) →

Alain LENGART, is working closely with hospital advisers from French hospitals so as to study and design for you the SEPARA 27, first mobile and translucent partition screen.

THE SEPARA 27'S ASSETS

MOBILE AND DISCREET

It ensures quiet and discretion during cares, awakenings, medical visits and social calls

HYGIENE AND MAINTENANCE

Cleaning is effective through damp wiping of the antibacterial hospital textile with M1 fire safety.

DESIGN

Almost invisible and very elegant aluminium framing.

Completely unnoticed when folded, its junction strips with matching colours go really well with the decorative elements of the bedroom when unfolded. The SEPARA 27 is identical on both sides.

AERIAL AND MANAGEABLE

Simple, light, and very resistant, it is also of easy and silent fitting and handling.
